

new technologies
for the
new millennium

Our entrepreneurial consulting engineers
design, develop and commercialise new
and innovative global products

International Activities

Innovative New
Product Concepts

Medical Devices

Research

- Identifying, sourcing and structuring information

Concepts

- Including Intellectual Property Development

Analysis

- Computational Fluid Dynamics (CFD),
Finite Element Stress Analysis (FEA),
Computer Simulation

Prototyping

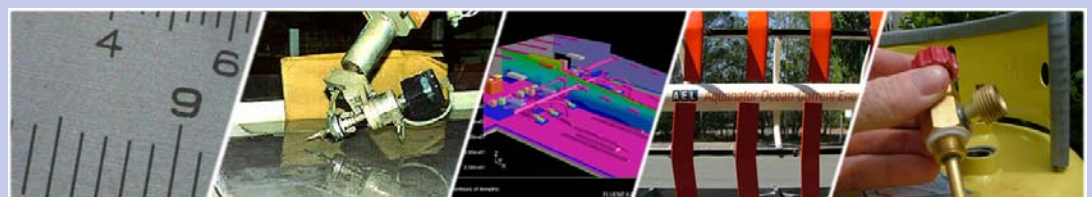

- Complete prototype development from
concept to in-service experimental testing

Design

- Advanced machine and product design
including 3D modelling (SolidWorks)

Commercialisation

- Comprehensive technical reviews and
advice for business planning, marketing
and R&D Finance
